

The man on the stage who does the trick of escaping from firmly tied ropes, submits to the bonds with a smile. He knows he can get out of the ropes that are being knotted. Put the same man in the woods and let Indian captors bind him to a tree for torture and he would struggle to the last against the bonds. When the stomach is discased there are bonds being woven every hour about the organs dependent on the stomachheast, lungs, liver, kidneys, etc. The folly of mankind is to possively submit to the fastening of these bonds with no effort to escape until the pain they cause arouses fear.
